Superb
Pleasure of
Custom Print

maiConcept

maiTM Concept

A series of custom print laminates that uniquely personalises your taste.

A collection of ready prints awaits your selection. Designs of your excellent creativity are doable too. We commit to fine delivery with our in-house printing technology and the use of specialised industrial paper. These are carefully done to achieve one thing – Superb Quality.

maiApplication:

- Horizontal and vertical applications
- Table tops / reception counters
- Wall cladding / wall panels / toilet cubicle systems (maiCompact)

The passion of Maica goes beyond manufacturing High Pressure Decorative Laminate (HPL) and Compact Laminates. In compliance with the European Standard EN 438, product quality is indisputably its primary focus. Notwithstanding, Green Manufacturing and Green Products have a very special place in the heart of Maica.

Maica is committed to manufacture environmental-friendly products with the use of sustainable raw materials. The use of kraft papers that are made of virgin pulps from non-virgin plantations / forestry has earned Maica the Singapore Green Label for the 'Made from Renewable / Sustainable Materials' category.

In addition, Maica's products are certified for GREENGUARD and GREENGUARD GOLD, the proofs of low chemical emissions that warrant healthy indoor air quality.

Moreover, Maica has secured MyHIJAU for its maiLaminate and maiCompact and that they are accorded with certain Green Building Index (GBI) credit points that come with tax benefits.

Since 2015, Maica has obtained FSC Chain of Custody (CoC) certificate with FSC™ License Code of FSC™ C126725. Maica is ready to produce FSC Mix label maiLaminate and maiCompact upon request by customers.

Our products also carry a combination of the following maiQualities

European Standard
EN 438

maiQualities

maiAnti-Bacterial

- Maica Laminates makes silver-ion antimicrobial technology a standard requirement for most of our laminate products.
- Our products are tested based on JIS Z2801:2012 for 5 types of bacteria: *Escherichia coli*, *Pseudomonas aeruginosa*, *Salmonella choleraesuis*, *Staphylococcus aureus* and *Methicillin-resistant Staphylococcus aureus*.
- It also reduces the level of microbes responsible for surface degradation and other associated issues, such as foul odour.
- Regular cleaning is required as part of the maintenance for the products as oil and dirt may undermine silver-ion technology from inhibiting the growth of bacteria and fungi.

maiAnti-Fungi

- Tested based on the ASTM G21 standard.
- Fungi tested: *Aspergillus niger*, *Penicillium pinophilum*, *Chaetomium globosum*, *Gliocladium virens* and *Aureobasidium pullulans*.

maiFood Contact Safety

- Our laminates products are certified by ISEGA, a laboratory in Germany, to be safe for use for food preparation and treatment on the basis that hygiene regulations are not violated.

Product Specification
Based on European Standard EN 438

Property	Property or attribute	Unit (min. or max.)		EN 438 Values HGS
Resistance to Surface Wear	Wear Resistance	Revolutions (min.)		
		Initial point		150

a) L = in the longitudinal (or machine) direction of the fibrous sheet material (normally the direction of the longest dimension of the laminate).

b) T = in the cross-longitudinal (cross-machine) direction of the fibrous sheet material (at right angles to direction L).

c) The above is a general Product Specification. Please contact our Sales Specialists for specific Product Specification.

Maintenance & Cleaning Instructions

General Cleaning Instructions:

- 1. Use a clean, damp, non-abrasive cloth and mild soap, non-bleach or household cleaner.
- 2. Rinse with clear water, using a clean, non-abrasive cotton cloth.
- 3. Avoid flooding laminate particularly areas near to seams to prevent water from seeping in and consequently causing substrate to swell.
- 4. Dry laminate surface with a soft, clean, non-abrasive cotton cloth.

For Stubborn Stains:

- 1. Food stains: Use a mild cleaner, detergent or general purpose cleaner, and a short, soft nylon-bristled brush to gently clean stains.
- 2. Ink stains: Remove stains immediately, using detergent or glass spray cleaner. Allow cleaner to remain on the stain for several minutes and then blot with a damp cloth before rinse.
- 3. Solvents such as denatured alcohol, nail polish remover or paint thinner can be used sparingly for very stubborn stains.

Caution: Excessive use of solvents will damage the laminate finish and cause it more susceptible to stains. Do not use cleaning agents containing acid, alkaline or sodium hypochlorite on laminate surface to avoid corrosion or permanent discolouration.

To prolong the lifespan of Maica's laminate surface:

- Do not use laminate surface as a cutting or chopping surface.
- Always remove stains or marks immediately before they set. Once set, they require more aggressive cleaning procedures that may damage laminate surface.
- Place a trivet, insulated hot pad or other protective padding beneath all hot cookware, heat generating appliances or other heated objects instead of putting it directly on laminate surface.
- Do not use steel wool or abrasive pads on laminate surface, and do not place steel wools on it to avoid metal rust stains.
- Do not slide ceramics and abrasive objects across laminate surface as they may cause scratch and premature wear.
- Do not use acidic or abrasive cleaning agents on laminate surface as it may damage surface.
- Do not allow contact between any materials or items contaminated with acidic or abrasive cleaning agents and laminate surface.

Disclaimer

- The samples and products of Maica are manufactured with certain tolerances. They may not originate from the same batch of production. Pigment variation and angle of observation may influence the colour of products. For accurate representation, customers are advised to request samples from our Sales Specialists.
- Sample chips in this catalogue are intended for viewing purpose only. For product tests, please request for actual product samples.
- Maica will not be responsible for any claim arising from any errors in pasting sample chips in the catalogue. Therefore, customers are expected to inspect the products they receive before fabrication or installation.
- All information in this catalogue is correct at the time of print. However, Maica reserves the rights to make changes to the information in this catalogue without prior notice.
- The liability of Maica for any potential manufacturing faults is limited to the cost of the products only.
