Summer

/maimai's
World

Splashing, Running, Carefully Hiking,
At the Beach, At the Field, Up the nearest Hill,
Dancing, Singing, Having Barbeque,
Reading, Driving, Wind blowing from the
Sunroof.

Summer Days are Awesome,
Summer Nights are Fun,
Hot and sweaty, maybe,
The ice-cream van is ready.

Blue skies, brown trees,
My Summer fun is here,
Come and join me,
A holiday complete!

of FAMILY and BELONGING

Blue

A SPECTACULAR colour
of CALM and PEACE

Filial Piety – World Elder Abuse Awareness Day *15 June 2018*

Without them, we will never enjoy who we are today. Today, they have aged, surely but gracefully. Be thankful that they are still here to share their wisdom and remind us all of the essence of life. Be filial, be respectful. They deserve it because they lived longer than us yet.

Maica's maiCSR WORLD BLOOD DONOR DAY *14 June 2018*

Blood Donation: *The Noble Gift of Life*

There is never too much blood in the hospital when it comes to an emergency.

Very often, we see the request for blood donation, sometimes in the form of emergency plea by family members asking for the public's generosity in replacement of the blood that had been used by their loved ones. Some of us are regular donors, while there are also those of us who are afraid of donating blood, or not able to donate due to health reasons.

If you are one of the blessed ones who qualify for blood donation, do know that there are these benefits waiting for you with each donation:

- a. Improved heart health by the improvement of overall cardiovascular health.
- b. Enhanced production of new blood cells, stimulated by the replenishment of blood cells by the marrow within 48 hours of donation.
- c. Burned calories, with 650 calories burned with each pint of blood (450 ml)
- d. Enhanced feeling of well-being especially in the elderly.
- e. Reduced cancer risk, including liver, lung, colon, stomach and throat cancers.
- f. Free health screening done as part of the mini blood test required for all donors.
- g. Saved lives. One blood donation can actually save three lives because there are 3 different components in the blood for different functions.*
- h. Joy to others.

Do you qualify as a blood donor? Find out at your local hospital with the free, compulsory mini blood test prior to your donation.

* Note: Platelets are for dengue patients and chemotherapy patients as they are low on platelet count. Red blood cells are used for blood transfusion in cases of accidents, operations, thalassemia and heavy bleeding. Plasma, with blood-clotting factors, are used to help burn victims.

I am not Siu mai I am maimai

World Day Against Child Labour *12 June 2018*

Children should enjoy childhood.
Leave adulthood to the adults.
