meiTM SUSTAINABLE

Lifestyle

Interpreting maiSustainable Lifestyle

An expression of maiSustainable Lifestyle through a myriad of green materials and products against a backdrop of our beloved mother nature, where we call home for comfort and joy. It is for this very reason that we, maimai, passionately steward it for the enjoyment of future generations.

maiTM SUSTAINABLE Lifestyle

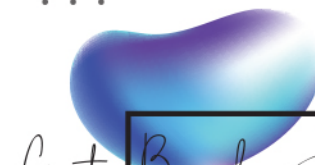

The passion of Maica goes beyond manufacturing High Pressure Decorative Laminates (HPL) and Compact Laminates. Incorporating the European Standard EN438 in the making, product quality has always been its primary focus. Over the years, aesthetic values are increasingly emphasised as Maica aims to add to its collection some timeless and classic designs.

The massive and rapid resource depletion from the mother earth has made Maica more resolute in manufacturing environmental friendly products. The use of sustainable raw materials that has earned us the Singapore Green Label 'Made from Renewable / Sustainable Materials' category helps to deliver ecological responsibility. Maica's compliance to the GREENGUARD and GREENGUARD GOLD certify that our products contribute to indoor environmental health. We have also secured "MyHIJAU" certification.

Collectively, the green certifications that we have obtained help to translate Maica's aspiration, 'Making Life Better, Everyday', through 'maiSustainable Lifestyle' into reality.

maiTM Miniatures

The collection of DIY
maiMiniatures is made
from maiCompact for
life's simple pleasure.

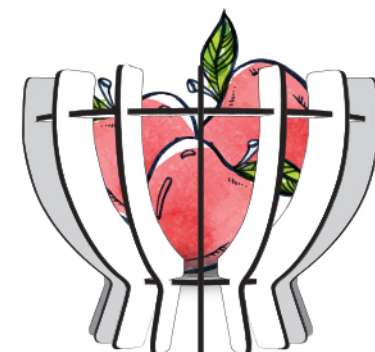

Creative Beyond

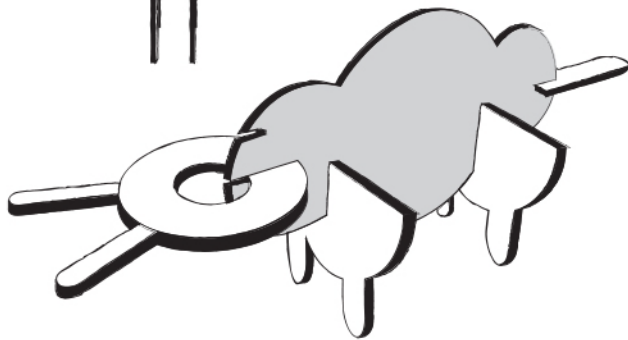

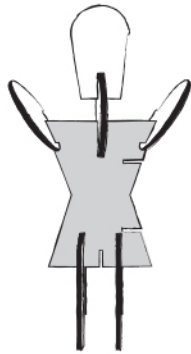

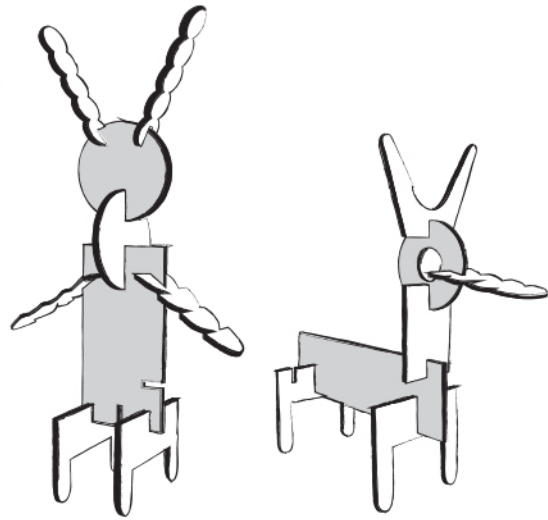

A touch of nature in an
architectural way.

Stylish Contemporary

Stylish, elegant, eco-friendly for
unique interiors.

Retrofitting

**Sustainability is no longer
a buzzword.**

It is now the way of life.

To this end, Maica ardently champions
green manufacturing and green
products.

maiTM Community

Demand for life does not warrant a big family size. Contemporary dwelling units are getting smaller. Urban living is attuned more for functional / work purpose. Yet, the desire for communal touch can never be totally quenched.
